## Job Description

Our client is looking for a positive and driven person to join our Machine Shop as a CNC Operator. Working as part of a strong collaborative team in our marine division, the CNC Operator will set up and run various jobs to produce accurate parts for our Marine products. We are willing to train the right candidate.

This position will be working on our Day Shift – Monday to Friday from 6:00am to 2:15pm.

### Our client offers:

- Competitive compensation packages, full-time employees are eligible for benefits package and RRSP matching program.
- Employees are valued, and everyone has a voice in the organization.
- Opportunities to grow

### Responsibilities

- Review set-up sheets and drawings to complete machined parts
- Load tools and perform set-ups for the completion of a job
- Take measurements and make adjustments to produce precision parts
- Select appropriate machines (e.g. lathes) and position or load material for a job
- Monitor machine while working to adjust the feed, maintain consistency and identify issues
- Perform routine machine maintenance and repair minor damages
- Must be reliable and show up for work consistently

### Required Work Practices and Competencies

- Experience in set-up and operation of CNC Mill/Lathe
- Experience with HAAS Machines is an asset
- Ability to use precision tools (e.g. calipers, micrometers) to take accurate measurements
- Ability to read blueprints, schematics, and manuals
- Good at math with analytical abilities
- Physical stamina and strength to lift heavy items
- Proven ability to work well under minimal supervision and can take directions and follow through
- Level 1 or 2 First Aid is an asset
- Strong organizational skills
